Vacuum Degassers
Continuous Casters
Electric Arc Furnaces
Continuous Annealers
Galvannealers
Tunnel Furnaces
And More!

The 1 and ONLY
FURNACE CAMERA SYSTEM
FOR THE
STEEL INDUSTRY

www.lenoxinst.com
The Most Durable System:
Lenox furnace cameras are more durable than the competition, leading to less failure in the field, better ROI, and increased productivity. Each system is backed by our industry leading Two Year Warranty!

Highest Resolution:
Other companies claim to have high resolution furnace cameras, but only Lenox offers 540 lines of resolution. Combined with superior optics, and a reliable cooling system you’ll have a durable furnace camera designed for the brutal atmosphere of the steel industry.

Reliable Cooling System:
When it comes to durability the most important aspect of a furnace camera is the cooling system. A malfunction in the cooling system will destroy most cameras. Lenox cameras employ a Dual Cooling System, which insures fewer failures in the field. Thousands of Lenox high temperature cameras are being used daily, and this is evidence of the reliability of our cooling systems.

Lowest Cost of Operation:
A Lenox furnace camera can reduce your plants air consumption by more than 21,000,000 CF per year, per system, resulting in a cost savings of over $5,000 per camera. This savings enables you to recoup your investment within 2 years. Contact Lenox for all the cost saving details.

The 1 and ONLY FURNACE CAMERA SYSTEM DESIGNED FOR THE STEEL INDUSTRY
with extreme durability, higher resolution, a tried-and-true cooling system, longer warranty and a much lower average cost to operate. Installation and field service is available.

#1 for Durability
